A: So far the best software I've found to convert a non-square portrait into a square format is called Square Portrait Collage. One click and it will rotate and/or crop the photo to a different format There are many pre-defined templates for different portrait formats Includes a crop tool for people who don't know how to crop portraits properly I only use it when I am trying to fit a portrait into the confines of a tabloid size page. A: You can try a software called PhotoMagick. You can read more about it here. PhotoMagick is an open source command line tool for performing various tasks with images, such as resizing, rotating, cropping, flipping, and metamorphosing (transforming). It supports many image formats, including BMP, GIF, JPG, JPEG, PCX, PNG, and TIFF. It can also perform operations on PDF documents, such as cutting or pasting pages. PhotoMagick is written in C and uses the PNG, JPEG, TIFF, PDF, and PPM libraries. A really simple example: import numpy as np import os import Image IMAGE_PATH = 'C:\Path\To\Image\File.jpg' SIZE = 1000 CENTER_X = 0.5 CENTER_Y = 0.5 IMAGE_DATA = np.array([[255, 255, 255, 255], [255, 255, 255, 255], [255, 255, 255, 255]]) # read image image = Image.open(IMAGE_PATH) image_data = np.array(image)
